FINCA Plus: The Second Revolution

FINCA Plus programs aim to improve the standard of living for the world’s poor by supporting the rise of social enterprises devoted to the development of high-quality and extremely affordable products and services across six sectors.

**Programs**

1. **BrightLife**: Solve the issues of distribution and credit to make basic service products affordable and accessible.
2. **FINCA Ventures**: Provide capital and support to early-stage social enterprises developing life-enhancing goods.
3. **FINCA Forward**: Create an innovation platform to test financial technologies and expand financial inclusion.
4. **Influence**: Advance industry understanding of market-based approaches to development.
FINCA International, a 501(c)(3) not-for-profit corporation with headquarters in Washington, DC, was founded in 1984 on a radical notion: giving small loans to the poor has the power to transform entire communities in a sustainable way. After impacting tens of millions of lives with responsible financial services, we are widening our focus to catalyze further economic growth and alleviate poverty in underserved markets around the world. We remain boldly committed to market-based solutions, and are supporting the rise of social enterprises delivering basic service and financial innovation to help low-income families and communities achieve a better standard of living.
